Fantasy Grounds: Shadowpunk 2 is a standalone ruleset for players to use in lieu of tabletop roleplaying games. The rules provide a framework for players to roleplay out their own adventures on their local games table, with tons of content to give the game depth and explore every aspect of the Shadowpunk setting. Within the Shadowpunk rules is an entire book of adventure suggestions for Shadowpunk 2. This includes quests, additional rules, and a dozen different town features, ranging from native american ruins to feudal societies. And to tie Shadowpunk to the tabletop, it features a completely revised and expanded dwarf, elf, human, and orc token set. The Dwarf, Elf, Human, and Orc token set contains 16 unique tokens to play yourself or a shadowpunk character in a tabletop setting with no fuss or muss. 64 Comments I love these tokens, because I can't use my game, I have a laptop and when I get the time, I play FFG Gothic and I got way to many tokens at the time. Now I have so many I use them to play quick games with my friends. To bad the current set don't work in two different games with same name. I bought all the tokens, and only 2 of them are missing. The nice thing about this set is that you can use them in multiple games at the same time. My character's casual and street set were missing, so I use them in my normal game and my digital RPG games. And they're great tokens. :) This is actually a perfect gift for a DM. These are the kind of tokens I've been wanting since I gave up my D&D roleplaying game. Amazing! A set of rules (new version, but with all the goodies of the previous versions) and tokens to play in both FFG Gothic and another Fantasy Grounds game, along with a few extra accessories to make your character stand out in the crowd (I needed the ideas to make a set of unique character traits for each race of my Ravenloft game, and these were a great help for me). Just finished playing with these tokens in in-character RPG. It's fun. A good package, both in content and aesthetics. All and all, quite satisfactory! Some minor quibbles, however: My pre-order has not arrived yet, and in the meantime I haven't been able to try this out. This should be noted, particularly since the author does go out of his way in

VR Game Mods VR Game Mods is one of many awesome communities that's sprung up in the last year from a popular modding support site. As a modder, the platform allows you to submit your mod, share it with other modders, and find community feedback. The platform also provides a way for modders to monetize their mods, since the website earns a few dollars. The best part is that the community is very friendly and helpful, so if you're looking to share your mod with friends on Reddit and Steam, VR Game Mods is the best place for... Review of The Spell Book Screenshots / Interview with developer Author: Sean Cline Published: September 19, 2017 VR game is a relatively new genre that allows you to play a game from a different perspective. For VR game players, this means looking through the eyes of a person or creature rather than directly at their surroundings. A few good VR games are currently in development, such as The Spell Book, which is an VR game that is unique and interesting. In this review, we'll be looking at how The Spell Book VR works. We'll also interview The Spell Book's lead developer, Tirden Ballgame. The Spell Book VR is both a short and yet a very... SurrealVRVR 2018 virtual reality (VR) event is coming soon! What's new in Fantasy Grounds - Echoes Of The Past: The Slarecian Legacy (PFRPG):

>'morning hi guys, tried to do some c++ dev after a bit. have some questions? I'm back if anyone can help me. I've spent a good few weeks / months messing around doing different things with wine, trying to get netflix to work. I finally decided to just dual boot windows 7 / ubuntu. Now, the windows side is fine, just as expected. But the ubuntu side is sort of in chaos. When I open nautilus, the home screen shows 2 folder icons. One icon is completely gray and just says "sync" over it. The other one has my third error: 'class' does not name a type I am trying to use the class code from an example online, but it does not like it also, does anyone know how to use classid? 7 if i create the new element in visual studio, then right click to view the class type, it obviously adds a function defined by the header class.cpp file. How to i do so in C/C++? welp thats done then, ill b rinning again.. have a nice one So I'm asking for help... should I try to do a clean up? I've been working on a project for a couple of years and it's definitely a mess. My stuff is horded under my home folder, etc. Anyone having issues streaming music from the terminal to a device? Tried Brasero Bluephi n VLC and they all crashes...:S One of the programs i used was gmusicbrowser, on terminal wrote 'unable to open location: file:///home/spookan/.kde/share/apps/kinternaltuner/volumeit/128000.mp3' but it was a non audio files.. :S well, i'm going to go to bed. hope i didn't miss anything interesting. night folks! night! anyone?? hi Yes? im trying to do some c++ dev (noob)

This is the first game of the T.k series. It's a squad based shooter game. The game mechanics are similar to that of "Strife" and "QuakeLive", where players have to cooperatively take control of a team of robots, kill the enemies, and manage the bases and other assets in order to protect themselves from the AI. The difference lies in that you have to manage your base so that you can reconfigure or repair your robots to make sure they are combat ready. As you progress through the game, you will be faced with more enemies and more obstacles. You'll be rewarded with more points if your robot functions well and it has the health of its teammates. This is a fast paced game that is fun, especially for single and multiplayer. This is a shooting game, a squad based shooter game where you have to fight against a city occupied by enemies which is trying to get back to its old glory. - there are 5 teams, each one with 3 players. - Each team has one base, one turret and one turbocharger - you can control the turrets, and the turbocharger through an interface or through the keyboard, mouse, and joystick. - the team with the highest percentage of remaining health will win. - your score will be defined in the HUD as "Score" "Turrets" is the total of all the turrets' lives. "Turbo" is the turbo level, and "BaseHealth" is the health of the base. The goal of the game is to survive. To stay alive longer, you must hide, defend your base, and find a way to revive your turrets. The weapons : - The Explosive launcher is the only weapons found in the game. It costs 250 health to use the launcher. It can fire rockets with concrete bullets. It can be only found in the ammo crates located in certain spots of the map, or in the field. If you bring the launcher, the player isn't able to deactivate the turret. - The Turret launcher costs 200 health to use. The turret launcher shoots towards the direction you point your mouse cursor (on the map, the direction of the arrow is the direction of the turret shooting). If you position your mouse cursor close to an enemy, the turret will shoot at that enemy. If it hits, you get health. - The Heavy Turret is the most powerful weapon. It costs 250 health to use. Once you use the
