What is Cybersecurity? | Infosec Institute. For beginners, however, cybersecurity is a security game of catch. Cybersecurity experts are now recommending that everyone should learn cybersecurity so they are more capable of defending themselves if they or their business is attacked. Cybersecurity aims to prevent such attacks by educating people on security and sharing best practices. Cybersecurity training provides a great opportunity for us to learn about best security practices, and exposes us to the threats around us by training ourselves to recognize them. For those who want to build a career in cybersecurity there is also a career plan provided. Cybersecurity is a challenging field, but with the right training, you could easily find yourself in a career that can give you the security and ethics you are looking for. Australian Prime Minister Malcolm Turnbull's visit to Israel and the Palestinian Territories will be the first for a serving Australian prime minister. "Israel and Palestine are uneasy neighbours with deep historical wounds and often ill-defined borders," Mr Turnbull told a news conference on Monday in Tel Aviv. "This visit is not a PR stunt... I have a strong interest in the people of this region, particularly their peace, security and prosperity." Mr Turnbull will meet with Israeli Prime Minister Benjamin Netanyahu, Palestinian President Mahmoud Abbas and Israeli leader at the United Nations General Assembly this week. Israel and the Palestinian territories have been locked in conflict for more than half a century. Israel was created in 1948 and fought four wars with neighbouring Arab states, most recently in 1967. Palestinians also fought four wars against Israel, most notably during the first Intifada in the early 1990s. Mr Turnbull will "focus on the opportunities and challenges of an enduring peace with Israel", his office said. He will meet Mr Netanyahu on Friday before leaving for the West Bank and Palestinian Territories. Mr Abbas will meet him
